National  
Assembly for  
Wales

Research  
Service

The National Assembly for Wales is the democratically elected body that represents the interests of Wales and its people, makes laws for Wales and holds the Welsh Government to account.

The Research Service provides expert and impartial research and information to support Assembly Members and committees in fulfilling the scrutiny, legislative and representative functions of the National Assembly for Wales.

Research Service briefings are compiled for the benefit of Assembly Members and their support staff. Authors are available to discuss the contents of these papers with Members and their staff but cannot advise members of the general public. We welcome comments on our briefings; please post or email to the addresses below.

An electronic version of this paper can be found on the National Assembly website at: [www.assembly.wales/research](http://www.assembly.wales/research)

## Labour Market Briefing: August 2015

### *Introduction*

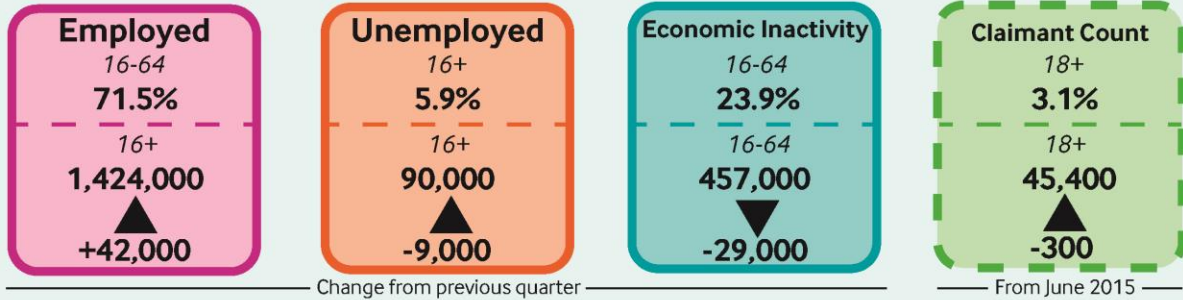

Labour market statistics are published each month by the Office for National Statistics (ONS). This paper is released shortly after the ONS data and aims to provide a brief summary of the latest situation across the labour market in Wales and the UK.

**This paper includes comparative information on unemployment, employment and economic inactivity rates in Wales and the other UK nations. Additionally, the latest headline labour market figures for Welsh constituencies are provided.**

The Research Service is able to provide **Assembly Members and their staff** with more detailed analyses in relation to unemployment and long-term labour market trends on request. If you would like us to do this, please contact Gareth Thomas on 0300 200 6307 or at [garethdavid.thomas@assembly.wales](mailto:garethdavid.thomas@assembly.wales)

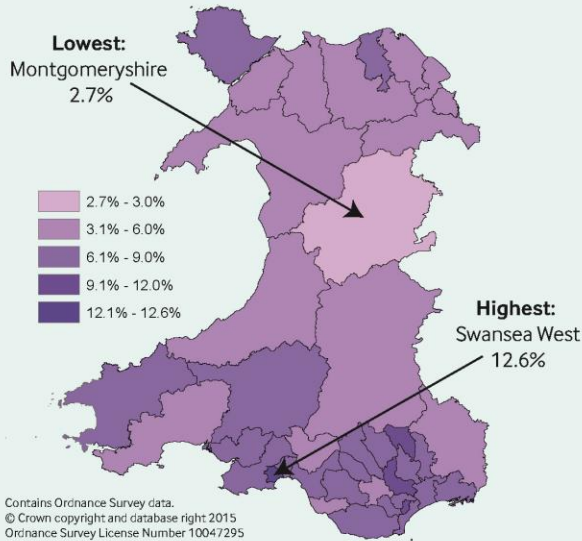

## HEADLINE STATISTICS FOR WALES

## ILO UNEMPLOYMENT IN WALES

### By Constituency

For 12 months to March 2015

### By Age Group

For 12 months to March 2015

### By Gender

## ILO UNEMPLOYMENT RATE - UK NATIONS

## WORKING AGE EMPLOYMENT RATE - UK NATIONS

Percentage of  
people aged  
16-64 who are  
employed

## Definitions of key terms relating to being in and out of work

When the Office for National Statistics (ONS) publishes statistics on the labour market, people are classed as being in one of three groups. **These are being in employment, being unemployed or being economically inactive.**

- **People in employment** are those aged 16 and over who did paid work (as an employee or self-employed), those who had a job that they were temporarily away from, those on government-supported training and employment programmes, and those doing unpaid family work;
- **People who are classed as ILO unemployed** are those aged 16 and over who are without a job, have been actively seeking work in the past four weeks and are available to start work in the next two weeks, or are out of work and are waiting to start a new job in the next two weeks; and
- **People who are classed as being economically inactive** are those aged 16 and over without a job who have not sought work in the last four weeks and/or are not available to start work in the next two weeks. The main economically inactive groups are students, people looking after families and the home, temporary and long-term sick and disabled people, and retired people.

There are two main measures of unemployment used by the ONS. In addition to the ILO measure outlined above, **the claimant count measures people who are claiming Jobseeker's Allowance (JSA) and Universal Credit.** It is lower than the ILO definition, because some unemployed people are either not entitled to claim benefits, or choose not to do so. **It is the most up-to-date unemployment measure.** For areas below the devolved nations and English regions, the JSA claimant count is used.

To take into account the differences between the number of people in different age groups and geographical areas, **the figures in this paper are mainly expressed as rates** rather than the number of people.

## Seasonally adjusted and non-seasonally adjusted data

**Headline ILO unemployment and claimant count data for Wales and the other UK nations and regions is seasonally adjusted by the ONS.**

This means that it is statistically adjusted to remove seasonal factors such as holidays and labour market recruitment patterns. For example, a large number of people leave full-time education and enter the labour market in the summer. To make it easier to identify labour market trends the ONS seasonally adjusts this data. **Other unemployment data such as that for age groups and Parliamentary Constituencies is not seasonally adjusted by the ONS.**

## 1. Unemployment in Wales

This section provides headline information on ILO unemployment rates and the claimant count across the UK. It also looks at unemployment by age. Key points from this section of the briefing include:

- The latest figures show that the ILO unemployment rate in Wales **is at its lowest point over the past five years, at 5.9% in April to June 2015**. Wales has the second highest ILO unemployment rate of the UK nations below Northern Ireland. (figure 1.1);
- The **claimant count rate** has seen a decrease across Wales and the other UK nations over the past two years. Wales' claimant count rate has been below only Northern Ireland for this period (figure 1.2);
- **Youth unemployment rates** across Wales are higher than for other age groups. However, these have decreased over the past four years from 23.9% to 18.9% in April 2014 – March 2015 (figure 1.3);
- Looking across the constituencies, **Swansea West** has the highest ILO unemployment rate at 12.6%, with **Montgomeryshire** having the lowest at 2.7% in April 2014 - March 2015.
- For the 'unofficial' Jobseeker's Allowance (JSA) claimant count statistics calculated by the Research Service, **Blaenau Gwent** had the highest rate at 5.7% in July 2015, with **Brecon and Radnorshire** having the lowest at 1.3%.

## 2. Employment and Jobs

This part of the paper looks at employment rates across the UK for people of working age (16-64). It also considers changes in employment in the public and private sectors in Wales. The main conclusions that can be drawn from this section include:

- The **working age employment rate** in Wales has increased over the past five years, with the current rate being 71.5% in April to June 2015 – **the highest rate since figures have been published.** (figure 2.1);
- **Over the past five years the working age employment rate in Wales has been above Northern Ireland, but below the other UK nations.**
- Over the past five years to quarter 1 of 2015, **employment in the private sector** in Wales has increased by 7.3%, while **employment in the public sector** has decreased by 8.9% (figure 2.2); and
- Looking at the constituency data, 80.2% of people aged 16-64 in **Brecon and Radnorshire** are in work in April 2014 - March 2015. In **Cardiff Central**, 53.3% of 16-64 year olds are working, the lowest rate of any of the Welsh constituencies.

### 3. Economic Inactivity

This part of the paper looks at people outside the labour market, those who are classed as being economically inactive. This includes people aged 16-64 without a job who have not sought work in the last four weeks and/or are not available to start work in the next two weeks. The graphs below consider the economic inactivity rate for people of working age across the UK, and look at the reasons why people in Wales are economically inactive. The key points from this section of the briefing are:

- **Wales has had a higher working age economic inactivity rate than the UK average throughout the past five years.** This has decreased over the past year, and is 23.9% in April - June 2015 (figure 3.1);
- The main reasons given by economically inactive people in Wales in April 2014 - March 2015 were temporary and long-term sickness (29.4%), being a student (25.6%) and looking after the family/home (21.1%) (figure 3.2); and
- At constituency level, **Brecon and Radnorshire** had the lowest working age economic inactivity rate in April 2014 - March 2015, at 17.4%, with **Cardiff Central** having the highest at 41.4%. This is partially due to the high number of university students living in Cardiff Central.

#### 4. What's happening in your constituency?

Table 4.1 sets out the latest headline labour market statistics for Welsh constituencies. The three constituencies with the best performance for each variable are highlighted in yellow, and the three worst performing constituencies are highlighted in purple.

Additional information on the labour market in your constituency including comparisons over time is available on the Research Service [constituency support pages](#).

**Table 4.1: Headline labour market statistics by Welsh constituency, April 2014 – March 2015**

Constituency	ILO unemployment rate 16+	Unofficial JSA claimant count rate (July 2015)	Employment rate 16-64	Economic Inactivity rate 16-64
Aberavon	7.2	3.1	63.3	31.6
